\*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

*Designed in 1958 by architects Daniel Palmer and William Krisel, this Modern one-story, front-gabled house faces east. The residence is 1,680 square feet, with three bedrooms and 1.75 bathrooms set on .23 acres. Medium-smooth stucco and vertical boards sheathe the exteriors. Windows are fixed, clerestory, and steel-framed casement. Sliding glass doors open onto the rear patio and swimming pool. A perforated concrete block wall extends southward from the entrance. Vertical slats form a trellis north of the entrance. Typical of these buildings, street-facing elevations feature solid walls topped by clerestories. Rear and side elevations boast extensive ceiling-to-floor glazing. The front entrance door is solid wood. The original plans included an interior garden atrium open to the sky. Desert landscaping of gravel, rocks, cacti, and drought resistant shrubs surround the house, which appears original and in excellent condition.*

Area *Rancho Mirage*

Period of Significance: *1951-1973* Property Type: *Single-family Residence* Applicable Criteria: *C*

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity)

*This house is architecturally significant as an example of a Palmer and Krisel designed desert tract home. The twelve houses located on adjacent Sandsal and Sandsu Circles were based on the virtually identical designs and floor plans originally drawn by Palmer and Krisel for the Alexander Company's Palm Springs tract developments. In Rancho Mirage, the firm of Maus and Holstein were the developers of these residences. Constructed in 1958, this home was owned by M. O. Anderson in 1961. Mr. Anderson was in real estate.*

*In the late 1950s, Robert Alexander believed that there was an unmet demand for moderately priced second homes in the desert. He was convinced that well-designed Modern tract houses with amenities such as built-in appliances, swimming pools, and landscaping would sell. In fact, the homes sold immediately and were a huge success. Palmer and Krisel went on to plan and design many tract developments built by the Alexander Company in the Coachella Valley, with an output totaling several thousand units.*

**\*B10. Significance (continued):**

*Partners Dan Palmer and William Krisel were graduates of the University of Southern California School of Architecture. Beginning in 1956, Palmer and Krisel were associated with developers George and Robert Alexander. Their first tract of 39 homes was built in the Twin Palms section of Palm Springs, south of Highway 111. Says author and critic Alan Hess, "Krisel used post-and-beam construction methods as he oversaw the Palm Springs projects. Butterfly roofs, natural stone walls, patterned concrete block, clerestory windows, carports – these designs showed that Modern could be a successful commodity in the housing market." Because of air-conditioning, a standard feature of each tract, "Alexander homes helped to usher in the era of year-round desert living," says Hess. Although the floor plans were essentially identical, the 1,600 square foot houses were available in a range of rooflines and facades, which gave each neighborhood a varied street appearance. Other desert projects included the residential subdivisions of Vista Las Palmas, Racquet Club Estates, Kings Point at Canyon Country Club, and Sandpiper in Palm Desert. In Rancho Mirage, for developers Maus and Holstein, Palmer and Krisel used their Twin Palms floor plan, slightly enlarged, and three roof configurations in the construction of sixteen houses on adjacent cul-de-sacs. Hess concludes, the Palmer and Krisel tracts "display the hopefulness and easy lifestyle of Modernism in the 1950s as it spread to a general audience." According to William Krisel, he and Palmer maintained ownership of the house plans and designs, which is why the Rancho Mirage tract of houses built by Maus and Holstein are so similar in form to the Alexander tract homes.*

*This property appears eligible for designation under an existing or proposed local ordinance, but does not appear eligible for listing in the National Register of Historic Places (a "5S1" National Register Status Code). The house is representative of the development of Rancho Mirage in the late 1950s and early 1960s as a viable community of second homes for middle-income buyers. This grouping of 16 tract houses was an excellent example of that trend, and this property is one of the few houses in the tract that has retained its original appearance. Additionally, the Palmer and Krisel designs are architecturally noteworthy for their clean lines, excellent floor plans, indoor/outdoor orientation, and attention to detail.*
